"Accelerating adaptation through Building with Nature in Indonesia"

19 November 2020

9.00-10.30am UTC+1 | 3.00-4.30pm UTC+7
(Amsterdam time) | (Jakarta time)

Highlights from 5 years of Building with Nature in Indonesia for coastal recovery. A lighthouse example for scaling up socially and ecologically inclusive adaptation action!

Indonesia is one of the first countries that embraced the Building with Nature approach, integrating nature-based solutions into water infrastructure.

Over 5 years, an inspirational Building with Nature programme was implemented in Northern Java at a landscape scale aiming to enhance coastal safety and revitalize the local economy.

This event presents our highlights and lessons learned, and introduces the multi-disciplinary team that designed and implemented the approaches used. We look at potential for further upscaling and how the experience from Indonesia can support upscaling Nature Based Solutions globally to accelerate adaptation.

The event is co-organized by Wetlands International, EcoShape, the Indonesian ministry of Marine Affairs and Fisheries (MMAF) and the ministry of Public Works and Housing (PUPR) on behalf of all consortium partners.

Keynote speakers: Hendra Yusran Siry, Secretary of Directorate General of Marine Spatial Management, Indonesian Ministry of Marine Affairs and Fisheries; Ardi Stoios-Braken, Minister Plenipotentiary, Embassy of the Netherlands in Indonesia; Jane Madgwick, CEO Wetlands International

Highlights and lessons learned: Femke Tonneijck, Project Manager, Wetlands International

Meet the multi-disciplinary team! Talkshow with consortium partners

Reflections by: M. Natsir, Regent of Demak; Dede Sulaiman, Researcher in Coastal Engineering, Indonesian Ministry of Public Works and Housing; Henk Ovink, Special Envoy for International Water Affairs of the Netherlands; Warthane Puvanarajah, First Secretary Climate and Environment, the Germany Embassy in Indonesia; Henk Nieboer, Director EcoShape.

The event will also be livestreamed on **Wetlands International's YouTube**

Supported by:

Ministry of Foreign Affairs of the Netherlands

Federal Ministry for the Environment, Nature Conservation and Nuclear Safety

based on a decision of the German Bundestag
